

Speak to Your Computer

& Vibe Code - Team Guide

For: Anyone with a laptop (cleanup, Airtable, docs, app fixes)

Setup: 10 minutes once. Saves hours every week.

You do NOT need: coding experience, the owner's Mac, or API keys in chat.

Your job: Say what you want. Review what AI did. Fix wrong details (money and customer names).

What this means (30 seconds)

Term	Plain English
Speak to computer	You talk; computer types. Use in ChatGPT, Cursor, WhatsApp
Vibe code	Describe outcome in normal words. AI types/edits. You check
Agent	AI that can change files and fix several things (Cursor or

Three speeds - pick one

FASTEST (phone): Voice note in WhatsApp -> Admin -> Airtable or ChatGPT

MEDIUM (laptop): Dictation ON -> ChatGPT/Claude -> copy to Airtable or ops chat

FASTEST FOR CODE (tech): Dictation -> Cursor Agent -> read diff -> Accept

If you are...	Use this
Operator on shift	Phone voice note -> Admin (not vibe code)
Admin / VA	ChatGPT + dictation for Airtable and messages
Tech / cleanup	Cursor + dictation for app and doc fixes
Huge repo cleanup	Codex + dictated prompt (owner approves)

Step 1 - Turn on talk and it types

Mac

- System Settings -> Keyboard -> Dictation -> ON

- Press

Windows

- Settings -> Time & language -> Speech (turn on)

- Win +

Phone (everyone)

- WhatsApp voice note to Admin - they transcribe or use AI

- iPhone

Step 2 - Vibe code without code (Admin + VAs)

Use ChatGPT or Claude. Turn on dictation. Say one of these prompts:

Clean up Airtable (say this)

I have a car rental business. Here are rows I verified by phone today:

[dictate

For each row tell me:

1) What

Do not invent phone numbers or dollar amounts I did not say.

Write a shift post (say this)

Write a SHIFT END post for ops WhatsApp.

Rules: E

Task list from voice notes (say this)

Turn my voice notes into a numbered task list for today only.

Mark each

Then: Copy AI output into Airtable or ops chat. Read every number and name before sending.

Step 3 - Vibe code in Cursor (tech role)

Install once

- Download cursor.com - sign in

- File ->

60-second loop

1. fn twice (Mac) or Win+H (Windows) - DICTATE request

2. Let C

Good voice prompts

Small fix:

On the payments page, change button label from Submit to Save Payment.

Do not cl

Cleanup:

Find duplicate headings in guides folder markdown only.

List dup

Deploy help:

Vercel build failed - here is the error [paste log].

Smallest

Bad prompts (waste time)

- "Fix everything" or "make the app perfect"

- Sayin

Step 4 - Heavy work: Codex

Many files or whole folder cleanup: open Codex desktop, same repo folder, dictate:

Bounded cleanup only. Read cleanup spec in docs folder.

Move loo

Owner or lead approves before merge.

Prompt recipe - GOAL -> RULES -> FACTS -> STOP

Part	Example (say it)
GOAL	I need a SHIFT END message for ops WhatsApp.
RULES	English only, under 12 lines, no made-up money.
FACTS	Collected 840 from Jay, blocked unit 12, handoff night.
STOP	Only give text to copy - do not post anywhere.

Adding STOP stops AI from doing extra steps you did not want.

Speed tips

- Dictate long, edit short - 45 sec talk beats 10 min typing

- One j

Safety - non-negotiable

Never	Always
Dictate passwords or API keys	Owner puts secrets in Vercel/.env
Trust AI dollar amounts	Call customer, dictate verified numbers
Accept without reading diffs	Undo (Cmd+Z) if wrong
Post AI text to customers	Lead reviews customer messages
Use owner's Mac	Your account, your machine

Old lists are **WRONG** until verified today - say that in every prompt.

Who should use what

Role	Speak / Vibe code
Operator	WhatsApp voice note / templates only
Admin Recorder	Dictation -> ChatGPT / Airtable draft
Lead Assistant	Dictation -> ChatGPT / OWNER BRIEF
VA Ops	Dictation for reminders / pin text
Tech cleanup	Dictation -> Cursor Agent / file fixes
Owner	All above / Codex for big repo jobs

5-minute practice (do once)

- [] Open Notes (Mac) or Notepad (Windows)
- [] Dictate: "Today I verified three payments: 200, 150, and 490."
- [] ChatGPT: "Format as SHIFT END collections line for WhatsApp, short."
- [] Numbers match what you said - you are ready
- [] (Tech) Cursor: Fix spelling in one file only, show diff

WhatsApp - send to team

NEW - work faster by talking to your laptop

1) DICTATION:

2) VIBE CODE = plain English, AI types it

3) Say ONLY numbers you verified today.

4) No boss Mac. No coding class needed.

Talk like you are briefing a smart assistant. Review like you are signing a contract.
